

MicroStation – Word Wrap

Overview

Do you experience problems with fitting long pieces of text? You can quickly and easily modify your paragraphs of text if you place text using the Word Wrap method.

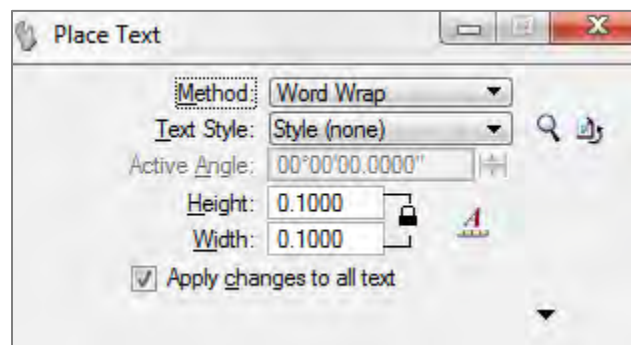

Workflow

Placing the Text

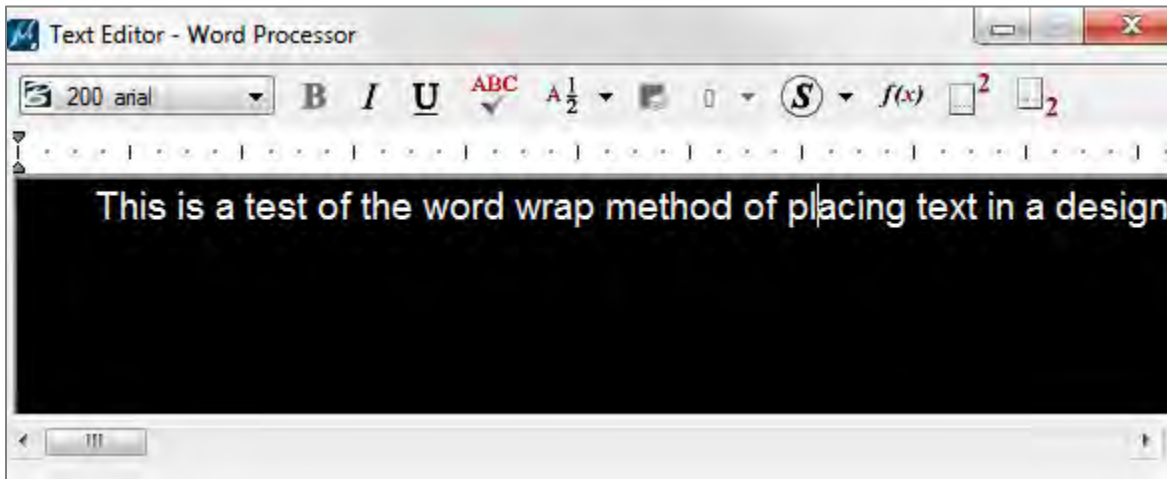

1. Ensure that you are using the MicroStation **Word Processor** for placing text.
2. Choose the **Place Text** command.

3. Select the **Word Wrap** method.

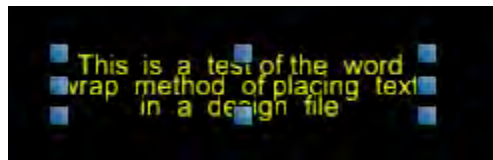

4. Enter text.

5. Pick two data points defining the location of the text.

Modify Text with Element Selector

1. Choose the **Element Selection** command.
2. Data point on the text and grips will appear.

3. Grab the corner of the text in the direction you wish to modify and data point to accept.

4. The paragraph has been modified.
