

# HYDRAULIC PROJECT APPROVAL

Washington Department of  
Fish & Wildlife  
PO Box 43234  
Olympia, WA 98504-3234  
(360) 902-2200

Issued Date: August 01, 2022  
Project End Date: July 31, 2027

Permit Number: 2022-9-7+01  
FPA/Public Notice Number: N/A  
Application ID: 28107

PERMITTEE	AUTHORIZED AGENT OR CONTRACTOR
WSDOT ATTENTION: Virginia Stone 310 Maple Park Ave SE Olympia, WA 98501-2348	

**Project Name:** WSDOT Bridge Maintenance and Preservation

**Project Description:** This work consists of performing the following maintenance and preservation activities on statewide WSDOT-owned bridges: drain cleaning, cleaning and washing, painting (including abrasive blasting and prep washing), general maintenance and repair, and deck overlay replacement. This work minimizes the degradation of these bridges to keep the structures safe and functional for the traveling public.

## PROVISIONS

1. **AUTHORIZATION LIMITATION:** This statewide general Hydraulic Project Approval (HPA) authorizes the following WSDOT bridge maintenance activities: drain cleaning, cleaning and washing, painting (including abrasive blasting and preparatory washing), general maintenance and repair, and deck overlay replacement. All other bridge work, such as wood removal from bridge piers, requires a separate HPA.

GENERAL PROVISIONS APPLICABLE TO ALL WORK ACTIVITIES UNLESS SPECIFIC OTHERWISE IN ACTIVITY SPECIFIC SECTIONS A THROUGH E

2. **TIMING LIMITATIONS:** The project may begin immediately and you must complete the project by July 31, 2027. Project specific timing limitations are noted for each section below.

3. **APPROVED PLANS AND SPECIFICATIONS:** You must accomplish the work per plans and specifications submitted with the application and approved by the Washington Department of Fish and Wildlife, except as modified by this Hydraulic Project Approval. You must have a copy of these plans and this HPA available on site during all phases of the project construction. Plans and specifications include, but are not limited to the following:

a. WSDOT Environmental Compliance Assurance Procedure (ECAP) for maintenance in WSDOT's Environmental Manual Section 700.02. For work performed by a contractor use ECAP procedures in WSDOT Construction Manual Section 1-07.5.

b. The Best Management Practices Field Guide consistent with the most recent version of the Regional Road Maintenance Endangered Species Act Program Guidelines (RRMP) Part 2: Best Management Practices. For work performed by a contractor, the requirements of Section 1-07.15 and 1-07.15(1) of WSDOT Standard Specifications will apply.

c. **INVASIVE SPECIES CONTROL:** Thoroughly clean all equipment and gear before arriving and leaving the job site to prevent the transport and introduction of invasive species if activities are conducted within the riparian area or floodway. Properly dispose of any water and chemicals used to clean gear and equipment. WSDOT maintenance staff must implement the specifications in WSDOT Integrated Roadside Vegetation Management Plans to control the spread of noxious and nuisance weeds, and Maintenance Operations AIS (aquatic invasive species) protocols included in the permit application. Additionally, the Washington Department of Fish and Wildlife's Invasive Species Management Protocols (November 2012) are available online at <http://wdfw.wa.gov/publications/01490/wdfw01490.pdf> for more

# HYDRAULIC PROJECT APPROVAL

Washington Department of  
Fish & Wildlife  
PO Box 43234  
Olympia, WA 98504-3234  
(360) 902-2200

Issued Date: August 01, 2022

Project End Date: July 31, 2027

Permit Number: 2022-9-7+01

FPA/Public Notice Number: N/A

Application ID: 28107

information.

4. NOTIFICATION PRIOR TO WORK START: Notification is required only for activities conducted under Section C. Notification of local Habitat Biologists for other activities is encouraged.

5. FISH KILL/ WATER QUALITY PROBLEM NOTIFICATION: If a fish kill occurs or fish are observed in distress at the job site, immediately stop all activities causing harm. Immediately notify the Washington Department of Fish and Wildlife of the problem. If the likely cause of the fish kill or fish distress is related to water quality, also notify the Washington Military Department Emergency Management Division at 1-800-258-5990. Activities related to the fish kill or fish distress must not resume until the Washington Department of Fish and Wildlife gives approval. The Washington Department of Fish and Wildlife may require additional measures to mitigate impacts.

6. To the extent practicable riparian vegetation (streamside or shoreline woody vegetation) within 200 feet perpendicular to the Ordinary High Water Line (OHWL) and adjacent to the structure must not be damaged. Within the riparian area existing parking lots and open managed fields and lots may be used for staging work.

a. Should riparian vegetation be damaged to such an extent that it is unlikely to survive; the vegetation will be replanted with native species of similar type (e.g. shrubs for shrubs, trees for trees).

b. Damaged plant species identified as invasive or noxious in WAC (WAC 16-750), will be removed and replaced with native species of similar type (e.g. shrubs for shrubs, trees for trees).

c. For short-term erosion control purposes, planting herbaceous species may be necessary.

7. Cleaned debris and other polluting substances from this project must be collected and then contained and deposited above the limits of the 100 year-flood or extreme high tide in a disposal site that has the appropriate regulatory approval. No debris or substances may be placed in the channel, in road drainages, wetlands, riparian (streamside or shoreline) areas, or on adjacent land where they may erode or leach into state waters. No petroleum products, hydraulic fluids, fresh concrete, sediments and sediment-laden water, chemicals, or any other polluting substances may be allowed to enter state waters.

8. To prevent leaching, construct forms to contain any wet concrete. Forms must remain in place until the concrete is cured.

9. Washing shall be done with clean water. No detergents or other cleaning agents shall be used except:

a. A 5.25% sodium hypochlorite solution may be directly applied onto areas of bird guano or fungus growth remaining after removal and any pressure washing of bulk deposit or growth. The sodium hypochlorite solution shall not be used as an additive to the water used for pressure washing. Wash water associated with the use of sodium hypochlorite must be fully contained and must not be allowed to enter state waters.

b. A degreaser on an absorbent material may be used to remove residual grease after hand cleaning the surface, provided none of this material may enter state waters.

10. This Hydraulic Project Approval does not authorize equipment crossings of the stream.

11. Limit the use of equipment waterward of the ordinary high water line to that necessary to gain position for the work.

12. Check equipment daily for leaks and complete any required repairs in an upland location before using the equipment in, over, or near the water.

13. Do not use wood treated with oil-type preservative (creosote, pentachlorophenol) in any hydraulic project. Wood treated with waterborne preservative chemicals (ACZA, ACQ) may be used if the Western Wood Preservers Institute has approved the waterborne chemical for use in the aquatic environment. The manufacturer must follow the Western Wood Preservers Institute guidelines and the best management practices to minimize the preservative migrating from

# HYDRAULIC PROJECT APPROVAL

Washington Department of  
Fish & Wildlife  
PO Box 43234  
Olympia, WA 98504-3234  
(360) 902-2200

Issued Date: August 01, 2022  
Project End Date: July 31, 2027

Permit Number: 2022-9-7+01  
FPA/Public Notice Number: N/A  
Application ID: 28107

treated wood into aquatic environments. To minimize leaching, wood treated with a preservative by someone other than a manufacturer must follow the field treating guidelines. These guidelines and best management practices are available at [www.wwpinstitute.org](http://www.wwpinstitute.org).

14. Any deployed containment, boom or filter structure must be routinely inspected and repaired as necessary to ensure its function. Debris and substances collected in the containment, boom or filter structure must be removed from the structure at least daily, whenever accumulation places the structure at risk, and before relocation or the removal of the structure.

15. **WORK SITE RESTORATION:** Upon project completion all temporary work structures, devices, equipment, materials, man-made debris and wastes from the project must be completely removed from within the OHWL, adjacent shoreline, and riparian areas.

16. **ANNUAL REPORTING:** A calendar year annual report must be uploaded to Application ID 28107 in the Aquatic Protection Permitting System (APPS) in unlocked Microsoft Excel (\*.xlsx) format by February 28 of the following year. In the final year of the HPA, the report must be submitted prior to the expiration date. An annual report is also required if no work was conducted. (If APPS is replaced, the annual report may be emailed to [HPAapplications@dfw.wa.gov](mailto:HPAapplications@dfw.wa.gov).) The annual report must include:

- a. Permittee, contact person, address, telephone number, date of report, time period.
- b. The permit number for this HPA, summary of the total number of individual projects by region and statewide.
- c. Problem(s) encountered: Such as inability to comply with provisions, lack of notification to WDFW, corrective action taken to rectify problems, and impacts to fish life and water quality from activity. If the Environmental Compliance Assurance Procedure (ECAP) or similar procedure was used, what activity triggered the procedure.
- d. Recommendations for improvement to best management practices and permit provisions.
- e. List of individual projects completed: By region including water body name, road number and milepost if applicable, latitude and longitude, start and end date of work, description of work.
- f. Except as noted in individual sections below, only projects that were conducted under one or more sections of this HPA need to be in the report. Other non-structural maintenance projects (e.g. light repairs, stripping, and safety cables) do not need to be reported.

## ACTIVITY SPECIFIC SECTIONS for BRIDGE MAINTENANCE and PRESERVATION

- A. DECK and DRAIN CLEANING.
- B. CLEANING and WASHING.
- C. PAINTING, INCLUDING PREPARATORY CLEANING, WASHING, and ABRASIVE BLASTING.
- D. GENERAL MAINTENANCE and REPAIR.
- E. DECK OVERLAY REPLACEMENT.

### SECTION A

**ACTIVITY DESCRIPTION: DECK AND DRAIN CLEANING:** This work occurs frequently for bridge safety and appearance and includes sweeping and/or vacuuming the deck, sidewalks, gutters, and drains. The only wash water that is authorized to enter state waters is direct drain flushing water after dry cleaning methods have been used in the drains.

1. **TIMING LIMITATIONS:** Work may occur year -around.
2. **NOTIFICATION and ANNUAL REPORTING** are not required for this work.
3. No work or equipment use **MAY** occur below the OHWL or affect the bed of state waters.

# HYDRAULIC PROJECT APPROVAL

Washington Department of  
Fish & Wildlife  
PO Box 43234  
Olympia, WA 98504-3234  
(360) 902-2200

Issued Date: August 01, 2022

Permit Number: 2022-9-7+01

Project End Date: July 31, 2027

FPA/Public Notice Number: N/A

Application ID: 28107

4. The deck must first be cleaned using dry methods and equipment (scraping, sweeping, vacuuming) that will prevent debris and substances from entering state waters.

5. During washing operations proper BMPs must be used at the deck drains to ensure dirty wash water and other debris will not be discharged to the water body. Upon completion of cleaning operations the BMPs will be removed and clean water can be used to flush out the deck drains.

## SECTION B

**PROJECT DEFINITION: CLEANING AND WASHING:** This work is cleaning and washing of all or part of a bridge structure for general maintenance or inspection purposes. In most cases, dry cleaning using scraping, sweeping, and vacuuming methods and equipment is completed first(see provision 5). Then the superstructure is washed. The wash water may enter state waters. See section C for provisions for cleaning and washing in preparation for structure painting.

1. **TIMING LIMITATIONS:** Work may only occur during the following times:

a. The permittee may discharge wastewater to surface water with flows less than 231 cubic feet per second (cfs) in Western Washington and less than 144 cfs in Eastern Washington only during seasonally high flow periods. The seasonally high flow periods are:

i. West of the Cascade Mountain Crest: November 1 to May 31.

ii. East of the Cascade Mountain Crest: December 1 to June 30.

b. For work located over marine water, the Permittee must avoid washing structures during high or low slack tide except when washing during slack tide is necessary for the health and safety of workers or the general public, or to avoid conflict with other legal requirements.

2. **NOTIFICATION** is not required for this work.

3. No heavy equipment may occur below the OHWL or affect the bed of state waters. The installation of BMPs may occur in the dry below the OHWL landward of the wetted perimeter.

4. The bridge must first be cleaned using dry methods and equipment (scraping, sweeping, vacuuming) that will prevent debris and substances from entering state waters. Bridges that have been cleaned within the past 12 months may be pressure washed without first dry cleaning.

5. On portios of bridges where paint may be dislodged by low water pressure washing techniques, only dry cleaning techniques are authorized. Washing must stop if loose pain is observed.

6. Washing must occur with the minimum water pressure necessary to accomplish the work but prevent existing paint from being removed and entering state waters.

7. During washing operations proper BMPs must be used at the deck drains to ensure dirty wash water and other debris will not be discharged to the water body. Upon completion of cleaning operations the BMPs will be removed and clean water can be used to flush out the deck drains.

## SECTION C

**ACTIVITY DESCRIPTION: PAINTING, INCLUDING PREPARATORY CLEANING, WASHING, AND ABRASIVE BLASTING:** This painting work includes preparatory dry cleaning the superstructure to be painted using scraping, sweeping, and vacuuming methods and equipment. A debris and paint collection containment and water filter structure is required. After dry cleaning, washing of the superstructure to be painted is done with high pressure equipment followed by selective areas abrasive blasting. Only filtered wash water may enter state waters.

# HYDRAULIC PROJECT APPROVAL

Washington Department of  
Fish & Wildlife  
PO Box 43234  
Olympia, WA 98504-3234  
(360) 902-2200

Issued Date: August 01, 2022

Permit Number: 2022-9-7+01

Project End Date: July 31, 2027

FPA/Public Notice Number: N/A

Application ID: 28107

## 1. TIMING LIMITATIONS:

- a. Saltwater: If the bridge is less than fifty (50) feet in elevation above the mean higher high water and the project includes a containment or filter structure or a temporary floating or pier mounted work platform that would result in temporary new area shading of eelgrass, kelp, and/or other intertidal wetland vascular plants longer than 72 hours, the shading part of the work shall must only occur from October 1 to April 30 to prevent shading impacts to such saltwater vegetation habitat.
- b. Freshwater: Work may occur year-around.

2. NOTIFICATION is required for this work. The permittee or contractor must notify the WDFW Regional Habitat Program Manager (RHPM contact info at bottom of provisions) prior to starting work. Notification may be by email, facsimile (FAX), telephone, or in person. Notification must include:

- a. WSDOT Region, WSDOT contact person, and telephone number.
- b. Water body name.
- c. Work location including latitude/longitude, road number and milepost if applicable, or comparable site location information.
- d. Starting date and estimated ending date for work.
- e. Application ID and Permit Number of the HPA.

3. No heavy equipment use may occur below the OHWL or shall affect the bed of state waters, except the use of temporary floating or pier mounted work platform. The manual installation of BMPs may occur in the dry below the OHWL landward of the wetted perimeter.

4. Minimal, non-destructive, disturbance (e.g. walking, sliding materials) to the stream banks or shoreline may occur when placing, using, or removing a temporary floating or pier mounted work platform.

5. Any temporary floating platform must not ground on the bed of state waters.

6. No temporary floating platform anchoring or pier mounted work platform may occur in freshwater that would disturb fish spawning areas or in saltwater that would disturb eelgrass, kelp, and/or other intertidal wetland vascular plants.

7. The bridge must first be cleaned using dry methods and equipment (scraping, sweeping, vacuuming) that will prevent debris and substances from entering state waters.

8. Wash water and debris resulting from pressure washing, including but not restricted to dirt and old paint chips, must be filtered with a #100 or finer sieve before that water is allowed to enter state waters.

9. Proper BMPs must be used at the deck drains during wet cleaning operations to ensure dirty wash water and other debris will not be discharged to the water body through the drains. Upon completion of cleaning operations the BMPs may be removed and clean water can be used to flush out the deck drains.

10. Dry method work that could result in debris and substances entering state waters, such as dirt, abrasive blasting medium, old paint chips, and new paint, must include a containment structure capable of collecting all such debris and substances.

## SECTION D

ACTIVITY DESCRIPTION: BRIDGE GENERAL MAINTENANCE and REPAIR: This work is to maintain the bridge structure and is restricted to maintenance, repair, or replacement of structural components above state waters. This work does not include new construction, replacement or expansion of the existing structure. The work may include use of temporary floating platforms and temporary work or jacking platforms in the dry above the wetted perimeter, as provided below. Installation of non-structural components (e.g. lights, signs, lane striping) does not require an HPA and

# HYDRAULIC PROJECT APPROVAL

Washington Department of  
Fish & Wildlife  
PO Box 43234  
Olympia, WA 98504-3234  
(360) 902-2200

Issued Date: August 01, 2022  
Project End Date: July 31, 2027

Permit Number: 2022-9-7+01  
FPA/Public Notice Number: N/A  
Application ID: 28107

is therefore not subject to this HPA.

## 1. TIMING LIMITATIONS:

- a. Saltwater: If the structure is less than fifty feet in elevation above the water and the project includes a containment or filter structure or a temporary floating platform that would result in temporary new area shading of eelgrass, kelp, and/or other intertidal wetland vascular plants longer than 72 hours, the shading part of the work may only occur from October 1 to April 30, to prevent shading impacts to saltwater vegetation habitat. Temporary work or jacking platforms located on the bed below the OHWL may only be constructed during the applicable fish life work windows (see ALLOWABLE SALTWATER WORK TIMES 2022 in the application record). Pier-mounted or floating temporary work or jacking platforms may be constructed and used year around.
- b. Freshwater: Work may occur year-around except: Temporary work or jacking platforms located on the streambed below the OHWL may only be constructed during the applicable fish life work windows (see ALLOWABLE FRESHWATER WORK TIMES 2022 in the application record). Pier-mounted or floating temporary work or jacking platforms may be constructed and used year around.

2. NOTIFICATION is not required for this work.

3. Equipment should be stationed on and operate from the WSDOT Right of Way (ROW) which may include only the dry portions of the streambed. Equipment is not authorized to enter the water. If equipment must be stationed outside the ROW it may do so provided no construction, land clearing, or other improvements occur outside the ROW.

4. Minor grading of the bank to allow temporary access for equipment is discouraged, but allowed provided no materials are brought in from off-site and the soils are stabilized and the access site is re-vegetated as required below upon project completion. Trees measuring 4.5 feet or greater in height above grade or with a diameter of four inches or greater must not be damaged.

5. Except as noted in provision 3 of this section, minimal, non-destructive, disturbance (e.g. walking, sliding materials) to the stream banks or shoreline may occur when placing or removing temporary platforms.

6. Temporary floating platforms must not ground on the bed of state waters.

7. No temporary floating platform anchoring or temporary work or jacking platform construction may occur in freshwater that would disturb fish spawning areas or in saltwater that would disturb eelgrass, kelp, and/or other intertidal wetland vascular plants.

8. Work that would result in debris and substances entering state waters must include a containment structure capable of collecting all such debris and substances.

## SECTION E

### ACTIVITY DESCRIPTION: DECK OVERLAY REPLACEMENT:

This work includes removal and replacement of existing concrete or asphalt overlay of the deck road surface, gutters, and sidewalks only where a structurally sound subsurface exists that will prevent existing or new overlay material from entering state waters. This work does not allow debris, materials, or substances entering state waters; new construction activities, or replacement of stringers and/or other structural supports.

1. TIMING LIMITATIONS: Work may occur year-around.

2. NOTIFICATION is not required for this work.

FPA/Public Notice Number: N/A  
Application ID: 28107

3. No work or equipment use may occur below the OHWL or affect the bed of state waters.
4. An existing structurally sound impervious subsurface is required to prevent existing deck material and new surfacing material from entering state waters.
5. All debris and water must be fully contained and disposed of in an approved location to prevent them from entering state waters.
6. Bridge drains must be blocked during existing surface removal and new surface installation to prevent water, debris, and other substances from entering state waters.
7. New overlay material must not be allowed to enter state waters.

## APPLY TO ALL HYDRAULIC PROJECT APPROVALS

This Hydraulic Project Approval pertains only to those requirements of the Washington State Hydraulic Code, specifically Chapter 77.55 RCW. Additional authorization from other public agencies may be necessary for this project. The person(s) to whom this Hydraulic Project Approval is issued is responsible for applying for and obtaining any additional authorization from other public agencies (local, state and/or federal) that may be necessary for this project.

This Hydraulic Project Approval shall be available on the job site at all times and all its provisions followed by the person (s) to whom this Hydraulic Project Approval is issued and operator(s) performing the work.

This Hydraulic Project Approval does not authorize trespass.

The person(s) to whom this Hydraulic Project Approval is issued and operator(s) performing the work may be held liable for any loss or damage to fish life or fish habitat that results from failure to comply with the provisions of this Hydraulic Project Approval.

Failure to comply with the provisions of this Hydraulic Project Approval could result in civil action against you, including, but not limited to, a stop work order or notice to comply, and/or a gross misdemeanor criminal charge, possibly punishable by fine and/or imprisonment.

All Hydraulic Project Approvals issued under RCW 77.55.021 are subject to additional restrictions, conditions, or revocation if the Department of Fish and Wildlife determines that changed conditions require such action. The person(s) to whom this Hydraulic Project Approval is issued has the right to appeal those decisions. Procedures for filing appeals are listed below.

---

**MINOR MODIFICATIONS TO THIS HPA:** You may request approval of minor modifications to the required work timing or to the plans and specifications approved in this HPA unless this is a General HPA. If this is a General HPA you must use the Major Modification process described below. Any approved minor modification will require issuance of a letter documenting the approval. A minor modification to the required work timing means any change to the work start or end dates of the current work season to enable project or work phase completion. Minor modifications will be approved only if spawning or incubating fish are not present within the vicinity of the project. You may request subsequent minor modifications to the required work timing. A minor modification of the plans and specifications means any changes in the materials, characteristics or construction of your project that does not alter the project's impact to fish life or habitat and does not require a change in the provisions of the HPA to mitigate the impacts of the modification. If you originally applied for your HPA through the online Aquatic Protection Permitting System (APPS), you may request a minor modification through APPS. A link to APPS is at <http://wdfw.wa.gov/licensing/hpa/>. If you did not use APPS you must submit a written request that clearly indicates you are seeking a minor modification to an existing HPA. Written requests must include the name of the applicant, the name of the authorized agent if one is acting for the applicant, the APP ID number of the HPA, the date issued, the permitting biologist, the requested changes to the HPA, the reason for the requested change, the date of the request, and the requestor's signature. Send by mail to: Washington Department of Fish and Wildlife, PO Box 43234, Olympia, Washington 98504-3234, or by email to [HPAapplications@dfw.wa.gov](mailto:HPAapplications@dfw.wa.gov). You should allow up to 45 days for the department to process your request.

**MAJOR MODIFICATIONS TO THIS HPA:** You may request approval of major modifications to any aspect of your HPA. Any approved change other than a minor modification to your HPA will require issuance of a new HPA. If you originally applied for your HPA through the online Aquatic Protection Permitting System (APPS), you may request a major modification through APPS. A link to APPS is at <http://wdfw.wa.gov/licensing/hpa/>. If you did not use APPS you must submit a written request that clearly indicates you are requesting a major modification to an existing HPA. Written requests must include the name of the applicant, the name of the authorized agent if one is acting for the applicant, the APP ID number of the HPA, the date issued, the permitting biologist, the requested changes to the HPA, the reason for the requested change, the date of the request, and the requestor's signature. Send your written request by mail to: Washington Department of Fish and Wildlife, PO Box 43234, Olympia, Washington 98504-3234. You may email your request for a major modification to [HPAapplications@dfw.wa.gov](mailto:HPAapplications@dfw.wa.gov). You should allow up to 45 days for the department to process your request.

## APPEALS INFORMATION

If you wish to appeal the issuance, denial, conditioning, or modification of a Hydraulic Project Approval (HPA), Washington Department of Fish and Wildlife (WDFW) recommends that you first contact the department employee who issued or denied the HPA to discuss your concerns. Such a discussion may resolve your concerns without the need for further appeal action. If you proceed with an appeal, you may request an informal or formal appeal. WDFW encourages you to take advantage of the informal appeal process before initiating a formal appeal. The informal appeal process includes a review by department management of the HPA or denial and often resolves issues faster and with less legal complexity than the formal appeal process. If the informal appeal process does not resolve your concerns, you may advance your appeal to the formal process. You may contact the HPA Appeals Coordinator at (360) 902-2534 for more information.

**A. INFORMAL APPEALS:** WAC 220-660-460 is the rule describing how to request an informal appeal of WDFW actions taken under Chapter 77.55 RCW. Please refer to that rule for complete informal appeal procedures. The following information summarizes that rule.

FPA/Public Notice Number: N/A  
Application ID: 28107

A person who is aggrieved by the issuance, denial, conditioning, or modification of an HPA may request an informal appeal of that action. You must send your request to WDFW by mail to the HPA Appeals Coordinator, Department of Fish and Wildlife, Habitat Program, PO Box 43234, Olympia, Washington 98504-3234; e-mail to [HPAapplications@dfw.wa.gov](mailto:HPAapplications@dfw.wa.gov); fax to (360) 902-2946; or hand-delivery to the Natural Resources Building, 1111 Washington St SE, Habitat Program, Fifth floor. WDFW must receive your request within 30 days from the date you receive notice of the decision. If you agree, and you applied for the HPA, resolution of the appeal may be facilitated through an informal conference with the WDFW employee responsible for the decision and a supervisor. If a resolution is not reached through the informal conference, or you are not the person who applied for the HPA, the HPA Appeals Coordinator or designee may conduct an informal hearing or review and recommend a decision to the Director or designee. If you are not satisfied with the results of the informal appeal, you may file a request for a formal appeal.

B. FORMAL APPEALS: WAC 220-660-470 is the rule describing how to request a formal appeal of WDFW actions taken under Chapter 77.55 RCW. Please refer to that rule for complete formal appeal procedures. The following information summarizes that rule.

A person who is aggrieved by the issuance, denial, conditioning, or modification of an HPA may request a formal appeal of that action. You must send your request for a formal appeal to the clerk of the Pollution Control Hearings Boards and serve a copy on WDFW within 30 days from the date you receive notice of the decision. You may serve WDFW by mail to the HPA Appeals Coordinator, Department of Fish and Wildlife, Habitat Program, PO Box 43234, Olympia, Washington 98504-3234; e-mail to [HPAapplications@dfw.wa.gov](mailto:HPAapplications@dfw.wa.gov); fax to (360) 902-2946; or hand-delivery to the Natural Resources Building, 1111 Washington St SE, Habitat Program, Fifth floor. The time period for requesting a formal appeal is suspended during consideration of a timely informal appeal. If there has been an informal appeal, you may request a formal appeal within 30 days from the date you receive the Director's or designee's written decision in response to the informal appeal.

C. FAILURE TO APPEAL WITHIN THE REQUIRED TIME PERIODS: If there is no timely request for an appeal, the WDFW action shall be final and unappealable.

<b>Lakes:</b> Columbia and Snake River reservoirs are not considered lakes. Lake is defined in WAC 220-110-020(47) as any natural or impounded body of standing freshwater, except impoundments of the Columbia and Snake Rivers.	Project-specific Work Time Required
<b>All waters within Indian tribal reservation, national park, state park, or wilderness boundaries</b>	Project-specific Work Time Required

<sup>1</sup>. The identified time for a county applies to all streams within that county, unless a specific time is given for a listed stream in that county. The time for a listed stream applies to all its tributaries, unless a tributary of that stream is also listed.

**ALLOWABLE MARINE WORK TIMES**

**March 2022**

Check the listing for the Tidal Reference Area in which you propose to work to determine the work time for that area.

WAC 220-660-330(3): The department will allow work waterward of the OHWL for the following times, areas, and species.

(a) Tidal Reference Areas 1 through 17; March 1 through October 15 for projects in or adjacent to documented Pacific sand lance spawning beds.

(b) Tidal Reference Areas 1 through 17; October 15 through May 15 for projects in or adjacent to juvenile lingcod settlement and nursery areas. April 1 through December 31 for projects in or adjacent to lingcod nests.

(c) Tidal Reference Areas 1 through 17; September 30 through March 15 for projects in or adjacent to juvenile rockfish settlement and nursery areas.

(d) Tidal Reference Area 14; October 1 through May 15 for projects in or adjacent to documented razor clam beds.

(e) Tidal Reference Areas 1 through 17; the authorized times and areas for protection of migrating juvenile salmonids in the nearshore, and for projects in documented Pacific herring spawning beds and in or adjacent to documented surf smelt are listed in the following table:

<b>Tidal Reference Area</b>	<b>Juvenile Salmonid Migration, Feeding and Rearing Areas</b>	<b>Surf Smelt Spawning Beds</b>	<b>Herring Spawning Beds</b>
1	July 15 - February 15	(not present)	April 1 - January 15
2	July 15 - February 15	April 1 - June 30	April 1 - January 15
3	July 15 - February 15	May 1 - September 30	April 1 - January 15
4	August 1 - February 15 for all work except dredging in all areas except Commencement Bay. September 1 - February 15 for dredging in all areas except Commencement Bay. July 15 - February 15 for all work in Commencement Bay.	April 15 - September 30	April 15 - January 15

**ALLOWABLE MARINE WORK TIMES**

**March 2022**

Check the listing for the Tidal Reference Area in which you propose to work to determine the work time for that area.

<b>Tidal Reference Area</b>	<b>Juvenile Salmonid Migration, Feeding and Rearing Areas</b>	<b>Surf Smelt Spawning Beds</b>	<b>Herring Spawning Beds</b>
5	August 1 - February 15 for all work except dredging. September 1 - February 15 for dredging in all areas except Duwamish Waterway. October 16 - February 15 for dredging in the Duwamish Waterway upstream of the East and West Waterways.	April 1 - August 31 in all areas except Eagle Harbor and Sinclair Inlet. In Eagle Harbor and Sinclair Inlet, authorization is conditional upon inspection because year-round spawning occurs.	May 1 - January 15
6	July 15 - February 15 for all work except dredging. September 1 - February 15 for dredging.	April 1 - August 31	(not present)
7	July 15 - February 15 for all work except dredging in Port Gardner and the Snohomish River. September 15 - February 15 for dredging in Port Gardner. September 1 - February 15 for dredging in the Snohomish River.	Authorization is conditional upon inspection because year-round spawning occurs.	April 15 - January 31
8	August 1 - February 15	Authorization is conditional upon inspection, because year-round spawning occurs.	April 15 - January 31
9	August 1 - February 15	Authorization is conditional upon inspection, because year-round spawning occurs.	April 15 - January 31 south of a line running due west from Governor's Point. June 15 - January 31 north of a line running due west

**ALLOWABLE MARINE WORK TIMES**

**March 2022**

Check the listing for the Tidal Reference Area in which you propose to work to determine the work time for that area.

## Standard Hydraulic Project

### AGENCY USE ONLY

Date Received: 2022-07-13

Application ID :28107

Online Submission

Amended Application

01. Application Information

**\* Application Type:**

Standard

**\* I am applying as a government agency, organization, or company for hydraulic projects anywhere within a broad geographic area but can't yet identify specific, discrete locations for those projects.**

Yes

**\* Site Description:**

This work consists of performing the following maintenance and preservation activities on statewide WSDOT-owned bridges: drain cleaning, cleaning and washing, painting (including abrasive blasting and prep washing), general maintenance and repair, and deck overlay replacement. This work minimizes the degradation of these bridges to keep the structures safe and functional for the traveling public.

**\* Are you applying for a long-term HPA for agricultural irrigation or stock watering purposes under RCW 77.55.021 (9)(c)?**

No

02. Project Identification

**\* Project Name (A name for your project that you create. Examples: Smith's Dock or Seabrook Lane Development)**

WSDOT Bridge Maintenance and Preservation

**\* NonSimplified Project Type(s) (check all that apply):**

Water Crossing Structure

**\* Simplified Project Type(s) (check all that apply):**

Road Maintenance Work

03. Applicant

**\* Business Name (if applicable)**

WSDOT

**\* First Name**

Virginia

**\* Last Name**

Stone

**\* Address 1**

310 Maple Park Ave SE

**\* City**

Olympia

**\* State/Province**

WA

**\* Zip Code (12345 or 12345-1234)**

03. Applicant	<input type="text" value="98501-2348"/> <b>* Country</b> <input type="text" value="United States"/>

08. Project Description	<b>* Will you be operating equipment in water?</b>
	Yes
	<b>* Type of equipment used</b>
	Under bridge inspection trucks, water trucks, vacuums, concrete and asphalt trucks, hand tools, barges with anchors (rarely), and other equipment.
	<b>* Summarize the overall project.</b>
	This work consists of performing the following maintenance and preservation activities on statewide WSDOT-owned bridges: drain cleaning, cleaning and washing, painting (including abrasive blasting and prep washing), general maintenance and repair, and deck overlay replacement. This work minimizes the degradation of these bridges to keep the structures safe and functional for the traveling public.
<b>* Describe how you plan to construct each project element. Include specific construction methods and equipment to be used. Identify where each element will occur in relation to the nearest waterbody. Indicate which activities are within the 100-year flood plain.</b>	

08. Project Description

The following bridge activities generally occur above the ordinary high water line (fresh water) and mean high higher line (marine water) on bridge structures above waterbodies. Work will occur year round for most listed activities below except as specified within the activities listed below.

Bridge Deck and Drain Cleaning: This work occurs frequently for bridge safety and appearance and includes sweeping and/or vacuuming the deck, sidewalks, gutters, and drains. The only wash water that may enter state waters is direct drain flushing water after dry cleaning methods have been used in the drains.

Bridge Cleaning and Washing: Work includes bridge cleaning and washing of the superstructure required to prevent metal and other material deterioration. Washing may be performed on the entire structure or only parts of the structure depending on the reason for the washing. In some cases only the deck and structure under the deck will be cleaned, or small areas cleaned for the purpose of inspecting specific elements of the bridge. This work typically includes first dry cleaning using scraping, sweeping, and vacuuming methods and equipment. Bridges that were flushed during the previous year do not require using the sweeping and vacuuming methods. This activity is for washing bridges over fresh waters and marine waters. This work does not require a water filter structure and is not involved with preparation for structure painting.

Bridge Painting, Including Preparatory Cleaning, Washing, and Abrasive Blasting: This painting work typically occurs every 15-25 years and includes preparatory dry cleaning the superstructure to be painted using scraping, sweeping, and vacuuming methods and equipment. A debris and paint collection containment and water filter structure is required. Cleaned debris is collected and contained and placed at a disposal site that has the appropriate regulatory approval. After dry cleaning, washing of the superstructure to be painted is done with high pressure equipment followed by selective areas abrasive blasting. The filtered wash water may enter state waters. No work shall occur below the ordinary high water line (OHWL) or will affect the bed of state waters, except it may include use of a temporary floating work platform.

Bridge General Maintenance and Repair: This work is to maintain the bridge function and includes maintenance, repair, or replacement of structure components above state waters in their existing configuration. This work may include cap replacement or stringer addition or replacement. Some work activities may require the placement of a temporary jacking pad (in the dry) to raise the bridge while structural members are repaired or replaced.

Bridge Deck Overlay Replacement: This work includes removal and replacement of existing concrete or asphalt overlay of the deck road surface, gutters, and sidewalks only where a structurally sound subsurface exists that will prevent existing or new overlay material (concrete or asphalt) from entering state waters. Preparation work may include grinding, or the use of abrasive material to remove a portion of the deck overlay material. A debris, material, and substance collection containment structure is required if any of these materials may enter state waters. This work does not allow the replacement of stringers and/or other structural supports.

This work does not include new construction, replacement or expansion of the existing structure within state waters or the flood plain; release of grindings, asphalt, concrete, debris, or toxic materials to state waters; work below the ordinary high water line (OHWL) other than the repair of structural members that are outside the wetted perimeter; or work that affects the bed of state waters; except it may include use of a temporary floating platform with an anchor, temporary work or jacking platforms in the dry.

**\* Requested Project Start Date:**

08/01/2022

**\* Requested Project End Date:**

07/31/2027

09. Waterbodies (other than wetlands): Impacts and Mitigation

**\* Describe how the project is designed to avoid and minimize adverse impacts to the aquatic environment.**

09. Waterbodies (other than wetlands): Impacts and Mitigation

All Bridge Activities: Work is primarily conducted on bridges above the Ordinary High Water Line in freshwater and the Mean High Higher Line in marine water. Best management practices will be used so no adverse impacts to waterbodies are anticipated. Potential impacts to fish and other aquatic life are associated with debris and other substances entering the water body below the structure. Structures will be dry cleaned for all activities, except what is listed below. Debris from site will be removed from the area and disposed in an approved upland site. BMPs will be used to prevent material from entering waterbodies. Specific BMPs are listed below by activity.

Bridge Washing related activities:

- Bridge drains will be plugged during flushing activities.
- Flushing activities will comply with conditions in the NPDES permit for Bridge Washing, including using the lowest pressure necessary to conduct the work. Wet washing activities will only occur on parts of the bridge without loose paint. Workers will stop wet washing activities if they see loose paint. Parts of the bridge with loose paint will be dry cleaned only.

Bridge Painting

- If Prep washing before painting, wash water will be filtered through a number 100 sieve to keep paint chips and other debris from entering the water and checked on a daily basis to ensure it is functioning properly.
- Containment structures will be used to prevent material from entering waterbodies while abrasive blasting.

Bridge General Maintenance and Repair :

- This could have a temporary impact on the aquatic bed.
- Containment structures will be used to prevent abrasive blasting material from entering waterbodies.
- Temporary floating work platforms may be used where appropriate. Floating platforms may, if left in place long enough, impact aquatic plants due to shading. In addition, there are potential impacts to riparian vegetation as access may be required adjacent to, or under the bridge.
- Timing restrictions for temporary floating work plat forms will be used to minimize impacts to eelgrass and other aquatic plants in salt water areas as defined in WAC 220-660-330. Measures shall be used to protect riparian vegetation habitat and allow personnel safe and efficient access to inspect and repair the structure.

Bridge Deck Overlay Replacement:

- Dry cleaning will occur to prepare the bridge dock for the new overlay.
- BMPs such as containment structures will be used to keep water and debris from entering the waters below.

In the event of potential violation of any environmental permit, DOT's Environmental Compliance Assurance Procedure (ECAP) will be followed as outlined in DOT's Construction Manual for work performed by contractors and DOT's Environmental Manual for maintenance activities conducted in house. Contracted out work will also follow the Standard Specifications for Road, Bridge, and Municipal Construction (Sections 1-07.5: Environmental Regulations; and 1-07.15: Temporary Water Pollution Prevention).

**\* Will your project impact a waterbody or the area around a waterbody?**

Yes

**\* Describe how your project will impact a waterbody or the area around a waterbody.**

<p>09. Waterbodies (other than wetlands): Impacts and Mitigation</p>	<p>We will flush wash water into waterbodies.</p> <p>Continuation of the question above:</p> <p>All work performed will follow the conditions set forth in WSDOT's most recent version of the NPDES permit with the Department of Ecology for Washing Bridges for work that involves discharge of wash water into waters of the state, applicable parts of the Regional Roadside Highway Program (RRHP), and applicable state/federal regulations.</p> <p>WSDOT Maintenance staff will use applicable parts of the Regional Roadside Highway Program (RRHP) for bridge drain cleaning, washing, and maintenance and repair. Work performed in house will follow the WSDOT Maintenance Operations Aquatic Invasive Species Prevention Protocol and the WSDOT Integrated Roadside Vegetative Management Plans if activities occur within the riparian area for the floodway.</p> <p><b>* Describe impact(s) that cannot be avoided through project design and implementation. For each location, please include the following: General location description where the impact(s) will occur (e.g. stream bank, beach front, 2-foot strip from bank, portion of gravel bar, etc.) Provide length, quantities, and/or area of impact</b></p> <p>We do not anticipate any unavoidable impacts.</p> <p><b>* Have you prepared a mitigation plan to compensate for the project's adverse impacts to non-wetland waterbodies?</b></p> <p>NA</p> <p><b>* Have you prepared a mitigation plan to compensate for the project's adverse impacts to non-wetland waterbodies?</b></p> <p>This work does not require mitigation plans because these bridge maintenance activities because of the use of BMPs to avoid negatively impacting waterbodies..</p> <p><b>* Describe the source and nature of any fill material, amount (in cubic yards) you will use, and how and where it will be placed into the waterbody.</b></p> <p>This work does not require using any fill.</p> <p><b>* For all excavating or dredging activities, describe the method for excavating or dredging type and amount of material you will remove, and where the material will be disposed.</b></p> <p>This work does not require excavation or dredging.</p>
<p>10. SEPA Compliance</p>	<p><b>* Compliance with the State Environmental Policy Act (SEPA).</b>  <b>For more information about SEPA, go to "<a href="http://www.ecy.wa.gov/programs/sea/sepa/e-review.html">http://www.ecy.wa.gov/programs/sea/sepa/e-review.html</a>"</b></p> <p>SEPA review is complete. I will upload, mail, or deliver a copy of the SEPA determination letter as part of this application..</p>
